SEAT GENUINE BATTERIES

The power reservoir

TECHNOLOGY TO ENJOY

DID YOU KNOW?

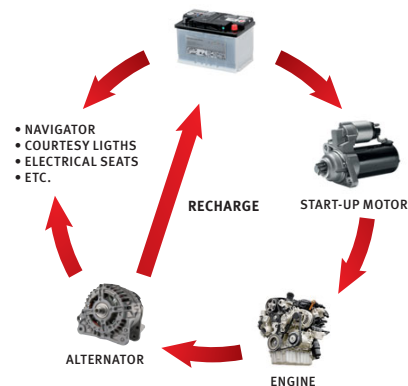

That starter batteries are the number 1 power supply during engine start-up and also serve as storage unit for the energy generated by the alternator during driving.

Electronics has a growing key role. Consumers and control units depend on the on-board network. Performance capacity of car batteries is considerably reduced in cold weather conditions.

For instance, in winter, the engine needs to use a great deal of energy for the starter motor and for consumers such as light, fans and heating.

Even statistics from the major automotive clubs show that the starter battery is one of the most frequent breakdown causes, mainly on short distance traffic as it requires higher power consumption than what the alternator has time to recharge.

Intense heat and long inactivity periods contribute to discharging and shorten its useful life span. These are only some of the facts that explain why the battery is a 'classic' wear part.

SEAT GENUINE STARTER BATTERIES

They guarantee start-up in winter cold weather conditions of up to -25°C. In summer, thanks to not needing to monitor water consumption, they are extremely reliable. They are also completely maintenance free and have a low self-discharging degree during use.

They have an integrated acid level indicator that makes it easy to know if the battery is in good condition. Different tests carried out by independent automotive institutions, show that they are convincing and set guidelines regarding their useful life span.

This is because of only using high quality materials that allow offering an extraordinary money for value ratio. Also, the Genuine SEAT starter batteries offer 3-year warranty.

ADVANTAGES

- / Cold start up to -25°C (-13°F).
- / Maintenance free.
- / Long product life.
- / Charge indicator included (level of acid).
- / Three year warranty.

SEAT GENUINE PARTS

- / Same quality as the parts used in vehicle manufacturing.
- / Contribute to making all the vehicle parts adapt perfectly well to each other, therefore rendering utmost safety, reliability and performance.
