## SEAT GENUINE WINDSCREEN

A window to the exterior

TECHNOLOGY TO ENJOY

## DID YOU KNOW?

The windscreen must always allow for perfect visibility. The front window glass and its powerful adhesive is a body component. Windscreen stability is drastically reduced when damaged from stone impacts.

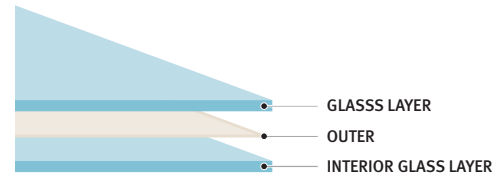

Even minor damage such as spots, scratches or small cracks can affect the complex structure of the glass. In such a case, the airbag could lose its effect if deployed.

The front passenger airbag hits against the windscreen when it deploys and the windscreen must be able to withstand the deploying.

Dust and sand particles, windscreen ice scrapers, etc. after time leave many traces of fine scratches.

As a result light disperses when the sun is low or shinning against it the effect of which is dangerous dazzling.

If a windscreen has reached a high state of wear it must be replaced for the benefit of traffic safety.

## SEAT GENUINE WINDSCREENS

They are manufactured according to all the series specifications to keep the stabilising effect in the vehicle's statics.

They allow full recovery of the original operating and functional safety after repair.

Thanks to its precise adjusting, they allow for simple repair processes, short assembly times, safe manipulating and reduced repair costs.

They provide effective UV protection and high driving comfort thanks to its excellent acoustic insulating properties.

Often, they can be repaired when damaged by stone impacts. For instance if the damage is not larger than a 1 euro coin and it is not in the vision field of the driver feasibility of repair is always considered.

## ADVANTAGES

- / Original driving safety layer.
- / Effective UV protection.
- / High optical quality.
- / Optimum adjusting precision.
- / Excellent acoustic insulation.

## SEAT GENUINE PARTS

- / The same quality as the parts used in manufacturing the vehicle.
- / They contribute to all the vehicle parts adapting perfectly with each other, therefore rendering utmost safety, reliability and performance.
