SEAT GENUINE WIPER BLADES

Improve visibility when you need it most

TECHNOLOGY TO ENJOY

DID YOU KNOW?

Windscreen wiper blades highly contribute to driving safety.

The rear wiper blades wear as much as the front ones and must be replaced at the same time. A wiper blade rubber on average performance will wipe approximately 800 km windscreen surface in half a year. Sun rays, air, and other weather influences turn the wiper blade rubber porous and make it crack and become stiff.

The wiper blade lip can suffer from hard insect remains on the windscreen or from freezing during winter. Damaged windscreen wiper blades can leave marks on the windscreen or a greasy layer, as well as squeaking or vibrating noisily. If this is the case, they have to be replaced.

SEAT GENUINE WINDSCREEN WIPERS

The Genuine SEAT wiper blades perform in all weather conditions without leaving marks. They provide controlled and even pressure thanks to their special elastic guides that adapt to the windscreen's curved shape.

Their wipe precision remains unaltered during their life span because of the quality of materials used.

The Genuine SEAT wiper blades provide uniform movement through its smooth rubber back and sliding layer, which lead to quiet performance. Even at high speeds their efficiency is unaltered. In addition they have been manufactured using special materials that are able to stand the winter cold and low temperatures.

And, so that you always have them in perfect condition, they include a wear indicator to remind you of the need to change the windscreen wiper blades.

ADVANTAGES

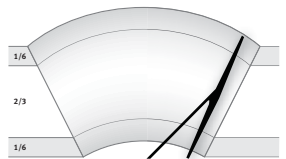

- / Perfect cleaning power in all weather conditions.
- / Long lasting wipe quality.
- / Smooth and quiet, vibration free wipe.
- / Optimum wipe performance in all speeds.
- / Really suitable for winter.

SEAT GENUINE PARTS

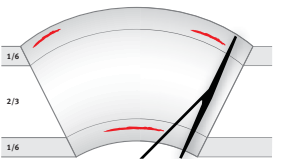

- / The same quality as the parts used in manufacturing the vehicle.
- / They contribute to all the vehicle parts adapting perfectly with each other, therefore rendering utmost safety, reliability and performance.

WIPE PATTERN DIAGNOSIS

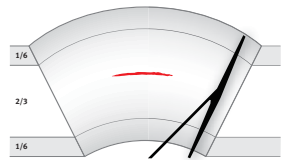

Compares visibility in rainy conditions with one of the illustrations.

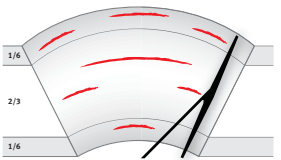

Without scratches.
No defects.

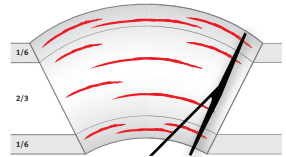

Max. 3 permanent scratches
in the outside visual field.
No defects.

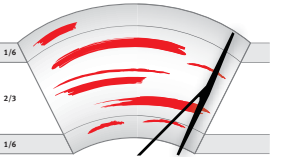

Max. 1 permanent scratch
in the central field of vision.
We recommend new wiper blades.

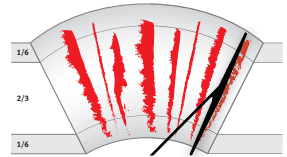

Max. 4 permanent scratches
in the outside field of vision
Max. 12 permanent scratches
in the entire field of vision.
We recommend new wiper blades.

Max. 6 permanent scratches on the exterior field of vision, many permanent and non-permanent scratches on the entire field of vision.
We recommend new wiper blades.

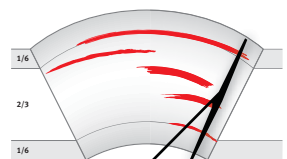

Grooves.
The wiper blades need to be changed.

Vibration marks.
The wiper blades need to be changed.

Non wiped zones in all the
field of vision.
The wiper blades need to be changed.

Grooves under the points
of contac.
The wiper blades need to be changed.
